ACM

EDUCATION

- 2012 **Ph.D.** in Computer Engineering, **Boğaziçi University, Turkey**
Thesis: “Improving Performance of Defect Predictors Using Confirmation Bias Metrics”
- 2004 **M.Sc.** in Computer Engineering, **Boğaziçi University, Turkey**
Thesis: “A Policy Specification language for an 802.11 WLAN with Enhanced Security Network”
- 2000 **B.Sc.** in Mechanical Engineering, **Boğaziçi University, Turkey**

PROFESSIONAL APPOINTMENTS

- 09.2020–now **senior researcher**, **University of Zurich, Switzerland**
Research in empirical software engineering with focus on human cognitive and social aspects, and experimentation in the context of code review.
- 09.2016–09.2020 **assist. professor**, **University of Gothenburg, Sweden**
Research in empirical software engineering with focus on human aspects. Taught 6 software engineering courses & 1 basic computer science course with 9 instances in total. Supervised B.Sc., M.Sc. and Ph.D. students.
- 10.2013–09.2016 **postdoc fellow**, **The Open University, UK**
Worked in the EPSRC funded “Privacy Dynamics” project for the design & development of privacy-aware software using theories from social psychology & logic based Machine Learning (ML).
- 08.2012–09.2013 **postdoc fellow**, **Ryerson University, Canada**
Worked at Data Science Lab with focus on ML methods on software engineering, and human cognitive aspects.
- 01.2003–06.2012 **research assistant**, **Boğaziçi University, Turkey**
Worked as a teaching assistant of 13 computer science courses including “Introduction to Programming” course that was taken by 350–400 students. Worked at industrial research projects in collaboration with IBM Canada, Logo Software, Turkcell and IBTech.
- 09.2000–12.2002 **R&D engineer**, **Alarko-Carrier, Turkey**
Modified designs of submersible pump shafts and burner fans.

AWARDS

- | | | |
|------|--|-----------|
| 2020 | ACM SIGSOFT Distinguished Artifact Award
“Primers or Reminders? The Effects of Existing Review
Comments on Code Review” | ICSE 2020 |
| 2013 | Best Paper Award , Industry Track, (First Author)
“Towards a Metrics Suite Proposal to Quantify Confirmation
Biases of Developers” | ESEM 2013 |

GRANTS & FUNDING

- | | | |
|------|---|------------------|
| 2018 | Chalmers Area of Advance SEED Funding
“SEFIS: Software Engineering for Intelligent Systems” | PI, 100k SEK |
| 2017 | Chalmers SWC Project# 3: Metrics
“Continuous Product & Organisational Performance”
(Sprints 13-14) | Co-PI, ~120k SEK |
| 2016 | Chalmers SWC Project# 1: Metrics
“Implications of Continuous Deployment” (Sprint 12) | Co-PI, ~60k SEK |

INVITED TALKS

- | | | |
|------|---|---------------------|
| 2020 | Advancing Research on Cognition in Software Engineering
University of Zurich | Zurich, Switzerland |
| 2019 | Software Engineering for Intelligent Systems
Chalmers ICT Area of Advance | Gothenburg, Sweden |
| 2017 | A Portfolio of Quality Metrics for Continuous Deployment
Software Center Breakout Session | Gothenburg, Sweden |
| 2016 | Privacy Dynamics: Towards Privacy-aware Software
Dept. of Computer Engineering, Bilgi University | Istanbul, Turkey |
| 2014 | Elicitation of Privacy Requirements Using Personas
Department of Computing & Informatics, Bournemouth Uni-
versity | Dorset, UK |
| 2014 | Modelling Human Aspects in Software Engineering
Department of Computer Engineering, Boğaziçi University | Istanbul, Turkey |
| 2013 | Confirmatory Behaviour of Software Developers
Department of Computer Engineering, Gebze Technical Uni-
versity | Kocaeli, Turkey |
| 2013 | Confirmation Bias in Software Engineering
Department of Computer Science, York University | Toronto, Canada |
| 2012 | Research 2.0: Confirmation Bias as a Human Aspect in Software Engineering
Microsoft Research (video of the talk) | Redmond, WA, USA |
| 2010 | Prediction of Defect Density by Using Confirmation Bias Metrics
Logo Software | Kocaeli, Turkey |
| 2009 | Confirmatory Biases of Developers and Testers
Turkcell | Kocaeli, Turkey |

PROFESSIONAL SERVICE

conference organisation committees

SPLC Conference Chair, Systems and Software Product Lines Conference, 2018.

conference organisation committees

CSCW Associate Chair, ACM Conference on Computer Supported Cooperative Work and Social Computing, 2021.

QUATIC PC member, International Conference on the Quality of Information and Communications, 2020.

SANER PC member, IEEE International Conference on the Software Evolution and Re-engineering, 2017.

CSMR-WCRE PC member, Conference on Software Maintenance, Re-engineering and Reverse Engineering (ERA Track), 2014.

conference paper reviewing as a reviewer/sub-reviewer

CSCW ACM Conference on Computer Supported Cooperative Work and Social Computing; 2019, 2020.

ICSM International Conference on Software Maintenance; 2013.

ESEM International Symposium on Empirical Software Engineering and Measurement; 2010, 2011, 2012, 2013.

PROMISE International Symposium on Predictive Models in Software Engineering; 2010, 2011, 2012, 2013.

SEAA EUROMICRO Conference on Software Engineering and Applications; 2013.

ICSE International Conference on Software Engineering; 2011, 2012.

journal reviewing

TSE IEEE Transactions on Software Engineering, IEEE

IEEE Software Special Issue: Diversity Crisis in Software Development, IEEE
Special Issue: Sentiment and Emotion in Software Engineering, IEEE
Special Issue: Green Software, IEEE

EMSE Empirical Software Engineering, Springer

JSS Journal of Software and Systems, Elsevier

IET Journal Institution of Software Engineering and Technology, IET

Transactions on Reliability IEEE Transactions on Reliability, IEEE

editorial assignments

Guest Editor IEEE Transactions on Industrial Informatics, Special Issue on Engineering Big Data Analytics Platforms on Internet of Things, 14(2):744-747, 2018.

TEACHING

teaching at University of Gothenburg

Data Structures and Algorithms (Spring 2018-2020, \approx 85 students)

Students learn about algorithm complexity, recursion, sorting algorithms, and data structures (e.g., linked lists) and abstract data types (e.g., stacks and queues). In Spring 2018 term, I designed the course from scratch. In Spring 2019 term, I redesigned this course introducing three more course components besides lectures so that this instance consisted of the following course components: (1) Lectures, (2) hands-on programming sessions, (3) problem sessions and (4) supervision sessions. I prepared all course material of each component from scratch.

Mini Project Team Programming (Fall 2019, \approx 85 students)

Students learn about project management and human aspects (e.g., group dynamics, cognitive bias-es during lectures, that are complemented by hands-on exercises done in class. Students put theory they learn during lectures into practice while working on a software development project in groups.

Product, Project and People Management (Fall 2016-2017, \approx 65 students)

Students learn about software project management (e.g., scheduling, effort and cost estimation, risk management) and human aspects.

Mini Project: Systems Development (Spring 2018, \approx 50 students)

This is the updated version of the “Project: Systems Development” course (see below) in the new curriculum where the scope of the autonomous mini-car system to be developed is delimited to fewer features.

Change Management in Software Development Organisations (Fall 2016-2017, \approx 30 students)

This course focuses on explanatory theories on organizational change and change management in software industry.

Project: Systems Development (Spring 2017, \approx 65 students)

This is a software development project course, which employs problem-based learning technique. Students work in groups developing a system for autonomous mini-cars and develop skills in requirements analysis, software design, quality analysis, programming and testing.

Project: Changing Software Development Process (Fall 2017, \approx 15 students)

This is an elective course where students are expected to conduct an exploratory research study in industrial settings. This instance continue from the previous with two additional tutorials that I prepared for data collection and analysis techniques.

teaching at Ryerson University

Business Information Systems 1(Fall 2012, \approx 60 students)

This course was offered as a service course for students from various programs at the university.

Applied Research Methods (Fall 2012, \approx 30 students, **M.Sc./Ph.D.** level course)

Students learn about qualitative and quantitative research methods. In this course, I lectured on data collection methods in field studies (e.g., interviews, questionnaires, shadowing, observation synchronized shadowing, participant observation, think aloud protocols), statistical analysis techniques, qualitative measures and construct validity.

TEACHING EDUCATION

pedagogy courses completed

- 2019 **Supervision in Postgraduate Education** (HPE201), **University of Gothenburg**
This course discusses the context of the postgraduate programme, its organization and conditions as well as various research environments and supervision cultures. This course also covers every day practice and ethical dilemmas of supervision of doctoral students. Supervisor's responsibility for documentation, planning, and follow-up of the doctoral work and supervisor's role as a mentor into the science community are also discussed.
- 2018 **Teaching and Learning in Higher Education 1: Applied Analysis** (HPE103), **University of Gothenburg**
This course aims to enhance knowledge and ability to analyse, reflect, discuss and design a pedagogical development piece of work on the basis of science and proven experience.
- 2017 **Teaching and Learning in Higher Education 2: Pedagogy at the Faculty of Science** (HPE102), **University of Gothenburg**
This course teaches how to design courses that effectively teaches students to think like a scientist. The course teaches to use backward design to plan a course providing a tool box of examples of active teaching and assessment methods.
- 2017 **Teaching and Learning in Higher Education 1: Basic Course** (HPE101), **University of Gothenburg**
This foundational course offers an introduction to learning theories, teaching methods and student learning in higher education.

STUDENT SUPERVISION & MENTORING

- 2016-ongoing **Katja Tuma (Ph.D. Student)**, University of Gothenburg, Sweden
“Efficiency and Automation in Threat Analysis of Software Systems”
Main Supervisor: Prof. Dr. Riccardo Scandariato
My Role: co-supervisor
- 2018-ongoing **Wardah Mahmood (Ph.D. Student)**, University of Gothenburg, Sweden
“Software product line engineering and variability management”
Main Supervisor: Prof. Dr. Thorsten Berger
My Role: co-supervisor
- 2016-ongoing **Jacob Krüger (Ph.D. Student)**, Otto Von Guericke University, Germany
“Feature oriented software evolution and human factors”
Supervisors: Prof. Dr. Gunter Saake, Prof. Dr. Thomas Leich and Prof. Dr. Thorsten Berger
My Role: mentor
- 2017 **Mohammed Al-Eryani and Emil Baldebo (B.Sc. students)**, University of Gothenburg, Sweden
“Effects of Automated Competency Evaluation on Software engineers’ Emotions and Motivation: a Case Study”
- 2020 **Mohannad Alahdab (M.Sc. student)**, University of Gothenburg, Sweden
“Empirical Analysis of Hidden Technical Debt Patterns in Machine Learning Software”

PhD EXAMINATION COMMITTEES

- 2019 Iflaah Salman, ‘The Effect of Confirmation Bias and Time Pressure on Software Testing’, Information Technology and Electrical Engineering, University of Oulu.
